

Animate Your Illustrations with After Effects

by Manon Louart | SKMT02LL - Animate Your Illustrations

Course link

- Prepare the files in Photoshop (recommended) beforehand
 - Make it into separate layers
 - Leave room for movement
- Resize it for proper resolution
 - For Instagram: 1080 × 1080; 72dpi
- Import .psd layers as a **Composition** with '**Editable Layer Styles**'
- To look good, your animation look must be a multiple of 24 (fps)
- Use an **Expression** to loop the animations
 - You'll do that for syncing each individual layer as well
- How to generate more organic movement:
 - Offset effects keyframes
 - Change keyframes values slightly
- Ease!
- ***The "Random Loop" Expression***
- ...

▼ Effects

- Distort > CC Bend It
